

The CSAT, Research Centre of the Valencian Foundation for Biomedical Research, was created to develop first-rate, competitive and at the same time internationally relevant research in the fields of regenerative medicine, biomedicine and the discovery of new drugs. The research centre, located in Valencia, occupies an area of 32,000 m² and boasts cutting-edge infrastructures, facilities and equipment. The CSAT, in collaboration with BRUKER is offering:

Postdoctoral position in the Laboratory of Structural Biology (Ref. PD04/011)

A postdoctoral position in the **Laboratory of Structural Biology** is available. More detailed information on the group's publications and lines of research can be found at: <http://www.ochoa.fib.es/>

Requirements:

- Ph.D. in Chemistry, Biology, Pharmacy or Biochemistry.
- The candidate should have expertise in running NMR spectrometers and in the application of modern NMR techniques.
- Previous experience in molecular biology and protein chemistry is also valued.
- Good interpersonal and communication skills, as well as the ability to work independently
- Endorsement by the Group Leader in the preliminary round of the selection process.

Advantages of joining:

The CSAT is dedicated to international excellence in biomedical research, and to translating new knowledge into improved medical practice.

The successful applicant will join a new and rapidly expanding centre born out of a commitment to research excellence.

How to apply:

Please send your CV and the names and addresses of at least two referees to Dr. Antonio Pineda-Lucena, **Laboratory of Structural Biology** (apineda@ochoa.fib.es). Application deadline: December 17, 2004. Joining date: January 1, 2005

The CSAT strives to be an equal opportunities employer. Applications will be reviewed in the strictest confidence, and are welcome from all sections of the community regardless of gender, nationality, or disability. The CSAT maintains a smoke-free policy, in compliance with health and safety guidelines and the protection of people from exposure to a smoky environment. Potential candidates who are active smokers are strongly advised not to proceed with their application to CSAT.
